## E-Therm

# Disinfection and ruderals control

Municipalities, cities and parks

E-Therm ET500-700-1000 & Combi

ENVO-DAN's ET program is designed with a strong focus on the working environment. The noise reduction is so effective that several municipalities have requested an indicator to confirm when the burner is running, as the tool carrier is much louder than the nearly silent burner. Additionally, the Weed Burner is designed for front mounting, allowing the driver to operate without constantly looking over their shoulder. ENVO-DAN's E-Therm burners cut propane consumption by up to 40%, leading to a significant reduction in CO<sub>2</sub> emissions. This not only makes them more environmentally friendly but also minimizes the driver's exposure to CO<sub>2</sub> compared to conventional burners. Furthermore, since E-Therm operates without chemicals, it leaves no harmful residues, ensuring a safe environment for park visitors, children, and pets.

### Technical specifications

- ❖ Propane consumption: 1-2 gpa (6 kg/h)
- ❖ Working speed: 3-4 mph (4 km/h) (depending on the type and quantity of weeds)
- ❖ Working width: 1,6- 3,3 feet (50/100 cm)
- ❖ Width according to customer demands
- ❖ Mounting: Adaptable to all types of carriers and tractors with A frame

### Benefits

- ✓ Quiet operation - minimal noise nuisance for both driver and surroundings.
- ✓ Energy efficient – reduces propane consumption by up to 40 %.
- ✓ Low CO<sub>2</sub> emissions .
- ✓ Ergonomic design - front mounting improves driver working conditions.
- ✓ Safe for people and animals – no chemicals, no harmful residues. Cleans parks without the risk of poisoning children or pets.
