E-Therm for Fruit-trees

Customised to your needs.

E-Therm is engineered with a strong focus on safety and efficiency, ensuring reliable operation even in wind conditions of up to 27 mph. Its versatile design allows for both front and rear mounting, adapting to your specific needs. Additionally, it can be customized with side torches, wheels, or other accessories based on your requirements.

With extensive industry experience and a strong commitment to organic farming, we have developed a new generation of energy-efficient machines with low CO₂ emissions. Thanks to our advanced technology, propane consumption is reduced by 40%, significantly lowering the carbon footprint.

Benefits

- ◆ Low noise
- ◆ Energy efficient- reduces gas consumption by up to 40%
- ◆ Low CO₂ emissions
- ◆ Meets workplace and environmental standards
- ◆ Standard frame for front or rear mounting

Technical specifications

- ◆ Propane consumption: 5.3 lbs/acre
- ◆ Working speed: 2.5 mph (depending on weed type and density)

Working width: 20" and 40" (custom sizes available upon request)
